15th EUROPEAN MECHANICAL CIRCULATORY SUPPORT SUMMIT

Multidisciplinary Approach
Heart Failure - Device Therapies

Dear Colleagues, dear Friends,

Due to the pandemic situation, we had to rethink our organization for EUMS 2020. Since the initial proposal of a hybrid meeting will not be possible in December, we had 2 possibilities:

- 3 days of fully dematerialized meeting
- Define a fully different virtual format to make it more attractive and more interaction designed.

Our group is very happy to announce you the EUMS WEEK – November 30th to December 4th – with 6 hot topics virtuals sessions on MCS from 6 p.m. to 8 p.m. Monday to Wednesday, 5 p.m. to 8 p.m. on Thursday and 4 p.m. to 8 p.m. on Friday..

As usual, interaction will be the corner stone of the session with 2-3 short presentations around 1 topic followed by an interactive discussion with international KOL.

Industry update will be included in the session when related to the topic and a full update session will be organized for the others.

Friday we'll give the chance to our young colleagues to share and discuss debated clinical cases and the best abstracts will be selected for short interactive discussion.

Finally, industrial symposia will be organized before the sessions. After one year of very few event dedicated to this field, we hope that this format will help our community to interact and work in the best condition we can offer in this context.

Of course, Hannover meeting will happen in 2021. Moreover, between EUMS week next December and EUMS 2021, we will organize other regular appointments to keep the relationship ongoing and our field to progress.

Talk to you soon.

All the best.
